Rhode Island Fire Academy Training Program

Strategic & Tactical Considerations for Fire Protection Systems (R0396)

The class will be presented by National Fire Academy instructors.

Course Description:

This five-day course is designed to provide Incident Commanders (IC) with the tools they need to conduct proper pre-incident planning for the target hazards in their communities. This knowledge will help the IC identify what fire protection systems are available at these sites, how they work, and how to use them in developing firefighting objectives and making strategic and tactical firefighting decisions.

The course covers the fundamental procedures for gathering and using information related to the fire protection systems that an IC may need during a fire or related emergency. It includes the basic concepts of pre-incident planning and the strategies an officer might use to share this information with other responders.

The course describes the components of sprinkler systems, stationary fire pumps, standpipe systems, fire alarm systems, smoke management systems, and specialty fire protection systems (e.g., Halon™ suppression systems, hood-range systems, water mist systems, etc.).

Date: January 21, 2019 (Monday – Saturday)

Location: Rhode Island Fire Training Academy
4 Green Lane
Exeter, RI 02822

Class Time: 8:00 a.m. – 4:00 p.m.

Cost: Free

Class Size: Limited to 24

Please register before December 21st.

Email registrations and FEMA Form to: Rhode Island Fire Academy
